- MPD makes a conscious effort among its Stations, Specialized Units, and Investigators to effectively communicate efforts in reducing MVTs. Among those efforts are a weekly dissemination of all Vehicle Recovery data. This report details maps, data, and Intel on all recovered vehicles within the city. The report list the station, ward, and location of the recovered vehicle; it list the vehicle year, make, model, color, and any strip or damage to the recovered vehicle. Most importantly, the report also list the station, ward, and location of where the vehicle was stolen from. This is an excellent tool used to share data on vehicle that are stolen and allows officers the ability to patrol locations where vehicles are prong to be dropped off.

Director,

Need your thoughts on how to handle the continuing increase in motor vehicle thefts when we release the YTD through March figures. I've attached the chart on the rate, which is 52% over last year. In raw numbers, it's averaging about 300 motor vehicle thefts per month compared to about 200 per month last year.

Is MPD doing anything special to tackle the problem ? Is there any quote on this you would like to provide for the press release ?
